

Seed Grants for Transitional and Exploratory Projects (STEP)

External Funding Potential Form

You must provide a written plan for external funding in the narrative. In addition, use this chart to list potential funding sources. Place the chart in your packet after your narrative section. The programs do not have to be an exact match, but use the section to build the argument that your planned STEP outcomes are supported by the funders' research mission, forecast, trajectories or current funding direction. Include argument for your research and competitiveness for external funding potential. In your discussion, include alternatives if the direction of the funders you list in the table changes.
